# Welcome

The Larson family would like to welcome you to our family's 58th production sale on April 17th at 1:00 pm. We are offering 74 bulls, 58 spring born 1st calf heifer pairs, and 40 bred heifers due in May. These are exciting times to be in the cow/calf business. The cattle market has been strong, and we believe it will remain strong for the foreseeable future with increasing demand for beef over chicken and pork. We cannot thank you - our customers - enough for your support over the decades, which has allowed the 5th generation to continue the ranching tradition.

The national cow herd numbers continue to decline with heifer retention, not keeping up with the natural rate of attrition to the mature cow herd. As an industry, we are going to need our females to stay in production longer than ever before. This is one reason we made the decision to invest in top end herd bulls and let natural selection be a major contributor to the selection and development process on this ranch. Our cows run in large, steep pastures in the White and Missouri river hills and are expected to last to at least 10 years old. We do not think that an older cow with lower EPDs is a negative to our breeding program. We look at longevity as a badge of honor that adds to our bottom line and will be a major factor in profitability of a cow herd in the future. Our herd bulls have to work hard and cover a lot of country. The environmental challenges of our ranch ensures the cattle that thrive here will do the same for you and pass along the economic traits of structural soundness, good feet and legs, muscle, fleshing ability, and most importantly fertility.

We look for herd bulls that have been raised by outstanding cows with proven production records not just stacked #s on a piece of paper and quick generational turns. We believe our herd sire selection process of demanding a sound structure, superior actual performance with the EPDs to back it up, proven production from the cow family that raised the bull combined with the environmental challenges our ranch provides will create exceptional cattle for you and your operation. We like to challenge our young bulls and would like to use the first calf crop from our Mogul M65K as an example of our selection process at work. He was raised by a pathfinder cow with a 366-day calving interval on 7 calves. As a yearling he bred over 40 cows in natural service. You will find 16 sons in this sale that excel in structural soundness, performance, foot quality, along with a consistent, attractive phenotype. Our cow herd and herd bulls are treated the same as commercial cows in this part of the country surviving (and thriving) on limited supplemental feed and natural protection while calving on their own in our river bottoms.

Here is a good opportunity for all of you, with the cow numbers so low, to quickly expand your herd today. We are offering 58 pairs that started calving March 30th, black and F1 BWF heifers all bred to Angus, low birthweight, higher growth bull. Also, in the offering will 40 May calving bred heifers, bred the same as the pairs. All heifers have had scour shots and have been pelvic measured.

Thank you so much for attending the sale, and placing your confidence in adding our program to yours, so we may help your expectations come to fruitions

**You can also view online at [www.DVAuction.com](http://www.DVAuction.com)**

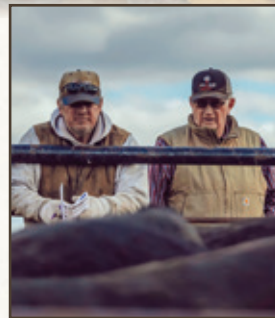

On behalf of the Larson Ranch, we welcome you to our bull and heifer sale. We appreciate your friendship and business. Have a blessed day!!

### 115 YEAR RANCH AWARD

Annual Winner Area Chamber of Commerce banquet. Pictured from left are Trace Larson holding Loretta, Katie Larson, Jesse Larson, Holly Larson, Audie Larson, Alyssa Swither of the Chamber board and Monty Larson. Not pictured are Darrell Larson and Joel and Vicki Stuart.

Life is really simple, but we insist on making it complicated.

**BREEDING SOUNDNESS EXAM**

Yearling bulls have passed a breeding soundness exam.

**HERD HEALTH**

The Larson bulls and heifers are on an excellent herd health program designed to provide optimal health and reproductive efficiency. Throughout their production cycles they have been given numerous vaccines to ensure their ability to perform at the highest level. These include IBR- P13-BVD-BRSV, Histophilus, Mannheimia Multimin Vitamin Shot, Haemolytica, Pasteurella Multocida, Mycoplasma, 7 way, Pinkeye and Anthrax. In addition they have been given Dectomax injectable and an Ivermectin pour on. They have all been ear notch tested negative for BVD. The bulls have all had a Virashield 6VL5HB vibrio leptos and Fusoguard foot rot vaccine. The heifers have been Brucellosis vaccinated, pelvic measured, given Vista 3VL5 prebreeding, as well as Gaurdian. All heifers’ pregnancies have been ultra sounded for age and if old enough the sex of the embryo determined. The Larson cattle have many years of outstanding success and are ready to go into any herd and get right to work.

**Gregory Animal Clinic, LTD., Gregory, SD**  
 Dr. Boaz Swift

Angus bulls were weaned on Oct. 1, Charolais on Nov. 1st and Simmentals on Nov. 11th. They were on a growing ration of ground hay, silage, free choice loose hay, distillers, minerals and vitamins. We try to grow them with good muscle; not burn them out with a hot ration of grain.

We believe we brought to town an even, excellent, thick, super fancy and showy set of bulls that will work in anybody’s herd with fantastic pedigrees and proven genetics behind these bulls.

**Larsons will retain 1/4 semen interest on all bulls**

**For more pictures, videos, and herd sires go to our website at [www.Larsonranchllc.com](http://www.Larsonranchllc.com) or [dvauction.com](http://dvauction.com)**

**REGISTRATION PAPERS**

Papers will be mailed (on registered) cattle upon request of buyer unless otherwise announced. Please leave information with the clerk at settlement. We will sign and mail papers to purchaser who can send them in to be transferred.

**PERFORMANCE RECORDS**

Performance records are included for your information and guidance in selection. We consider them important but not absolute. We have tried to provide in these records enough information to help you in selecting a bull which will best fit your needs.

**TERMS AND CONDITIONS**

Terms of the sale are cash. Each animal will be sold to the highest bidder. Bidding disputes will be settled by the auctioneer, whose decision will be final. All cattle will be at the purchaser’s risk as soon as sold, but will be cared for the best possible. (All remarks sale day take precedence over catalog.)

**ACCIDENTS AND LIABILITIES**

All persons attend the sale at their own risk. The sellers and sales management assume no liability, legal or otherwise, for any accidents occurring in, on, or about the premises.

**– Volume Discount –**

A volume discount of 5% will be given on the purchase of 5 to 9 bulls bringing over \$5,000 each. (not averaging \$5,000) A volume discount of 5% will be given on 5 bulls, 10% will be given on 10 bulls or more.

**BOTH FALL 2024 & SPRING 2025 SALES WILL BE TIED TOGETHER.**

This year every bull that sells for \$5,000 or more will be guaranteed against breeding injuries until September 1, 2025. We will guarantee the bulls to be breeders and to pass a breeding soundness and fertility exam (Penile Hematoma, Preputial Tear, Testiclitities) if your bull is unusable we will credit you the difference between your purchase price and the salvage value of your bull on a bull in the Dec. 2025 sale, that being said your bull will be covered for 100% value. We will try to have a loaner bull available for you to use the balance of the 2025 breeding season, (until September 1, 2025) at which time you can return the loaned bull to the Larson's. The bulls are not covered for abuse, neglect or lack of care. Any bull that brings under \$5,000 will be guaranteed at 1/2 credit towards the Dec. 2025 sale using the difference between purchase price and salvage value. We will try to have a loaner bull available for you to use until September 1, 2025 at which time the bull can be returned to the Larson's (the opportunity for you the day of the sale so you may insure your bull yourself that day.)

## BOARDING OF BULLS AFTER SALE

We can take all the bulls home and keep them free of charge until May 15th (a \$2.00 per day after May 15th). Any bull that brings over \$5,000 will be kept free of charge until June 1, 2025. It would be greatly appreciated if all bulls could be picked up by June 1st, 2025, or as soon as possible. As the weather warms up the bulls run a higher risk of injury due to riding & fighting. We will do our best to care for the bulls but injuries can happen. Thank you VERY much.

## SALE TERMS AND CONDITIONS

Except for those stated in the below terms and conditions, there is no warranties, either expressed or implied, as to merchantability of fitness for a particular purpose with respect to the livestock being sold at this auction. The warranties and guarantees set forth in the "terms and conditions" are in lieu of all other warranties, either expressed or implies, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claim through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

### BIDDING

Each animal will be sold to the highest bidder without reserve. The person in charge will settle any disputes as to bids, and his decision on such matter shall be final.

### ANNOUNCEMENTS

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

### BREEDING GUARANTEE

1. All animals are guaranteed to be breeders, with the exception of
  - a) Calves under twelve months of age;
  - b) Animals shown by purchaser after the sale (in cases of animals shown after purchase, the breeding guarantees, if any shall be such as agreed upon between the seller and the buyer);
  - c) Injury or disease occurring after the sale;
  - d) Gross negligence or willful misconduct on the part of the purchaser
2. **Bulls** are guaranteed breeders if not allowed to run with the herd until at least 12 months of age. Any bull which settles cows by natural service and passes fertility test made by competent fertility tester, mutually agreed upon by buyer and seller, during 6 months period of trial (provided for in paragraph 2 of the section of these sales terms and conditions) shall be considered a breeder. Any guaranties with respect to the ability to freeze semen shall be by separate agreement between the buyer and seller.
3. **Safe in Calf Females** have been examined by a competent veterinarian and are so guaranteed.
4. Bulls have passed semen fertility test.

Martin-Trudeau will be at the sale if you wish to insure your bull. Any bull bringing over \$5000.00, Larsons will pay 1/2 of the premium we also have our guarantee program found on page 2.

All of these records are provided as tools and aids in selecting a bull. But never select breeding stock just on records, but also on eye appeal, structural correctness, herd longevity of the sires and dams, fertility and herd history.

To get your weekly EPD updates, you can go to the Angus Association each Friday and view them.

**Success is how high you bounce when you hit bottom.**

# WHAT ARE EPDs?

**ESTIMATED PROGENY DIFFERENCES (EPDs) ARE A PREDICTION OF HOW A SIRE OR DAM'S OFFSPRING WILL PERFORM COMPARED TO OTHERS.**

EPDs are a representation in the difference in pounds, inches, or centimeters (depending on how that trait is weighted or measured.) The EPD numbers do not correlate to an actual weights or measurement however, there are only to be used to compare against other animals EPDS to represent a difference in genetic potential. For example, a 2.1 BW EPD does not correlate to an 85-pound actual calf. When comparing a 2.1 BW EPD bull to a 1.1 BW bull you could expect a one-pound difference in actual birth weights between the two sires.

**Calving Ease Direct (CEB):** The percentage of unassisted births of a sire when used on first calf heifers. Higher is more favorable. This is to be used when looking for bulls to be used for heifers. We recommend an 8 or higher.

**Birth Weight (BW):** The difference in pounds of birth weight. In today's production Angus genetics, we find that there are not many bulls that should present calving difficulties in mature cows. The BW EPD is preferred as a selection tool more than an actual birth weight of the Bull. Environment and management can change the birth weight of an animal so drastically that the EPD is a better tool.

**Weaning Weight (WW):** The difference in pounds at Weaning. Also seen as a 205 weight in places.

**Yearling Weight (YW):** The difference in pounds at yearling. Also seen as 365-day weight in places.

**Milk (MK):** The difference in pounds at weaning as a result of milk production of daughters. Honestly this EPD we don't worry about unless they are in the top 5 or bottom 5 % of the breed as there is little to be known about how much milk is actually being produced among the different environments and management in this country.

**Scrotal (SC):** The difference in scrotal circumference in Bulls sons

**Docity (DOC):** The difference in docility scores. Cattle are given scores for disposition and a higher docility is more favorable.

**Carcass Weight (CW):** The difference in pounds of a hanging carcass weight

**Marbeling (MB):** the difference in the USDA marbeling scores. Higher is more favorable.

**Rib Eye (RE):** The different in the square inches of the rib eye.

**\$Maternal (\$M):** An index (combination) of multiple EPDS that pertain to the profitability difference from conception to weaning for those retaining their own replacement females. Index's are contrived of scenarios that don't necessarily fit each

production producers management, resources, niche markets or goals. You can also use Index's for quick sorts but you would have to look towards the individual traits of your needs ideally.

**\$Beef (\$B):** An index (combination) of multiple EPDS that pertain to the terminal profitable difference from weaning to harvest. This index awards cattle for higher YW, CW, MB, RE and lower fat.

**\$ Combination (\$C):** The index (combination) of Index's. This primarily is a combination of \$Maternal and \$Beef. This index can easily be influenced by terminal or maternal trait and is not a true prediction of something complete or combined. In most cases it can be, but we still encourage you to look at all traits that best suit you and use \$C as a quick sorting tool.

**DNA scores:** Below many EPD bars you will find a line of 18 traits (many that have been abbreviated just like the EPDS above). These are DNA scores and are represented as a percentile rank within the breed (lower is more favorable). This just shows another layer of the tools used in the decision making that goes into the more accurate EPD above The EPD takes into account, parental information, DNA information, and weights and measures of the actual animal.

**%Ranks in EPDs:** Under many EPDs you will see % ranks. That shows how that animal ranks within the breed for that trait. Example, 1.87 MB 1%, that means that animal rank is in the top 1% of the breed for MB EPD.

There are 26 different EPDs and Index's provided by the American Angus Association. We list the EPDS and Index's that are most pertinent to our customers to save space and time. We know some prefer more information and it is always available at WWW.Angus.org In the upper right-hand corner enter the animal's registration number in the research bar and the entire pedigree and EPD profile is at your fingertips.

**What you do today can improve all your tomorrows.**

An outstanding calving ease bull to lead off our spring sale with top end performance at both weaning and yearling. He carries this weight easily on a sound, well balanced structure. His mother is beautiful cow that is feminine, long made, sound structured, and good uddered. This is a bull that is make a poaitive impact on any cow heard for many years with extra pounds to sell and high quality replacement females.

A calving ease bull with breed leading growth EPDs. A +10 CED with growth EPDs of 90 WW & 158 YW EPD produces extra pounds to sell. Top the calving ease and growth off with a solid cow families with proven longevity. His maternal grand dam produced into her teens while the sires grand dam entered Graesser's ET program as an 11 year old cow this year. This is a well balanced good bull that is bred to be this way, and we believe he will be an excellent sire in your program. A bull well suited to run in big open country and cover a lot of cows.

When you lose, don't lose the lesson.

He was a favorite on the South Dakota Angus tour, and he has not stopped. This bull continually caught our eye all summer and fall. Extremely long bodied, deep, heavy muscled with large testicles, this is a bull that will add performance and fertility to any program. His Rainfall dam was our pick of the heifer calves in the Brookdale mature cow herd dispersion, and she has produced as we expected. Both his sire and dam are backed by multiple generations of pathfinder cows that have produced past 10 years of age. You can expect this bull to sire pounds to sell, and the productive females that we all need for the future.

Here is a good beef bull. Heavy muscled and sound structured with a big weaning and yearling weights. His dam brings in this type calf year after year. His sire's first calf crop is outstanding for both bulls and heifers. We anticipate this bull siring very similar to his sire for length, muscle, soundness, and consistency.

“Turn from evil and do good; seek peace and pursue it.” – Psalm 34:14

A M65K son with more frame. His 11 year old dam has been a consistent producer and still maintains a good udder. She is from a cow family that has consistently produced into their teens. This is a good bull that can add quality and value to your replacement females while also siring superior feeding cattle.

# COMMERCIAL HEIFER PAIRS AND BRED HEIFERS

Heifers will be sold gate cut, 5 or more. We will start with group 1A and 1B of the pairs. The winning bidder may take group A or B or all of both.

## GROUP 1A

40 Black Heifer Pairs

## GROUP 2A

17 Black Bred Heifers

~ Due to Calve April 29 for 28 days

## GROUP 3A

10 Black Bred Heifers

~ Due to Calve May 27 for 12 days

## GROUP 1B

18 BWF Heifer Pairs

## GROUP 2B

12 BWF Bred Heifers

~ Due to Calve April 29 for 28 days

## GROUP 3B

4 BWF Bred Heifers

~ Due to Calve May 27 for 12 days

**Pairs can be loaded out beginning April 18th with prior notification, as to have health and brand papers available. Bred heifers may load out starting April 17th, AFTER the sale is concluded, NOT during the sale.**

Heifer pairs are bred to sons of  
Basin Rainmaker 4404, SAV Seedstock and GAR Ashland

**BASIN RAINMAKER 4404**

**GAR ASHLAND**

**SAV SEEDSTOCK 4838**

**Proverbs 3:5 "Trust in the Lord with all your heart and lean not on your own understanding."**
